

How to activate cookies

Select your browser from this list and follow the step by step instructions.

[Internet Explorer 6/XP](#)

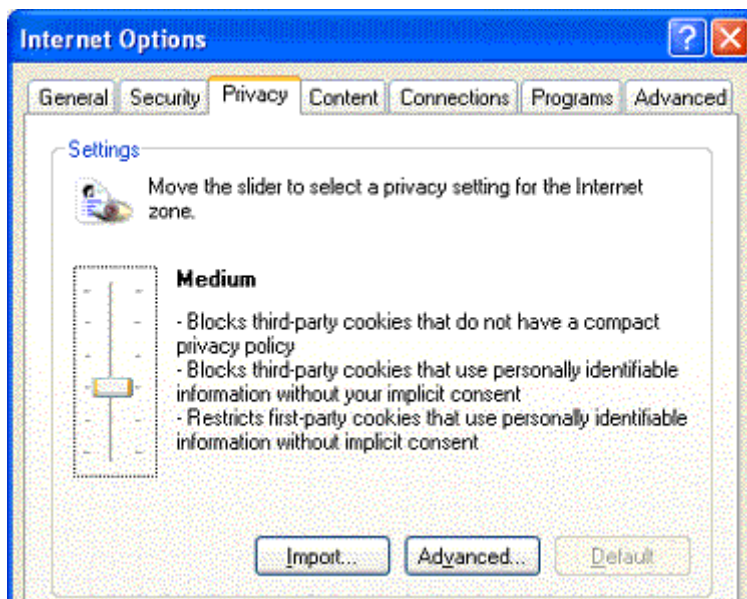

[Internet Explorer 5](#)

[Netscape](#)

[Mozilla Firefox](#)

How to set cookies in Internet Explorer 6/XP

- 1 On the toolbar go to Tools then choose Internet Options.
- 2 A new screen will appear. Click on the Privacy tab. You should either see a slider similar to the one pictured below, or the word custom. Click the **Advanced** button.

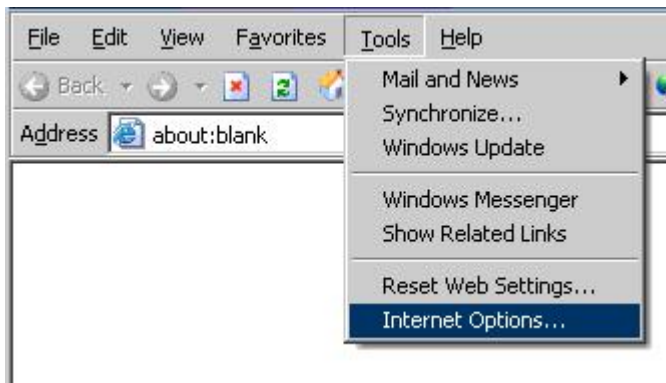

- 3 Check **Override automatic cookie handling** and select **Accept** under both "First party Cookies" and "Third party Cookies." Also, Check "Always allow session cookies".

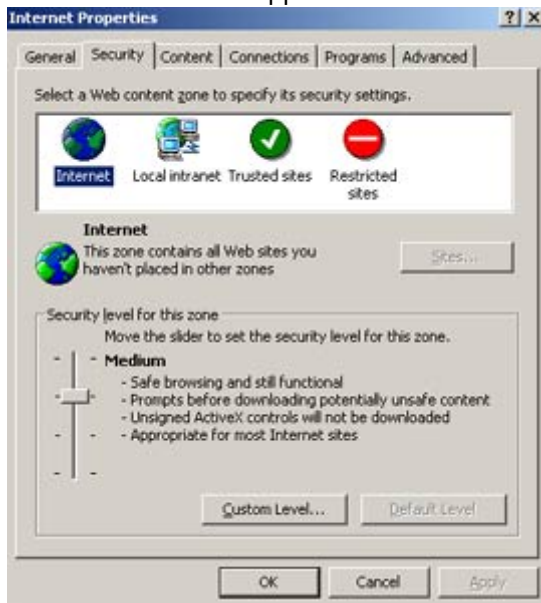

Click OK out of internet options - close all your open IE6 windows, and restart IE

How to set cookies in Internet Explorer 5

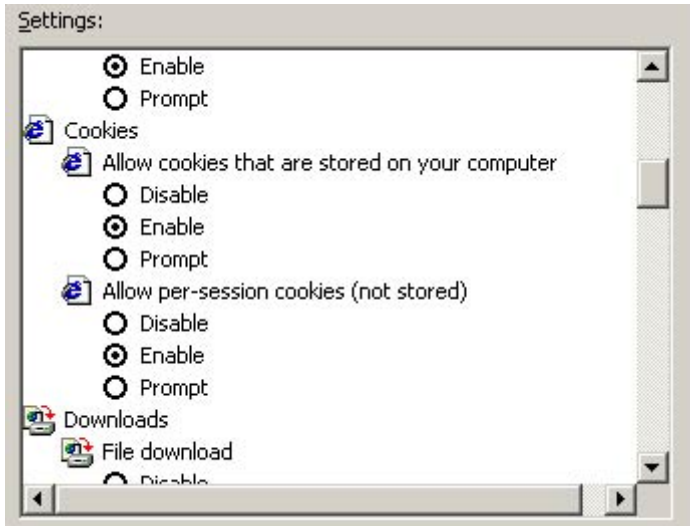

1 On the toolbar go to Tools then choose Internet Options.

2 A new screen will appear. Click on the Security tab then click on the Custom Level button.

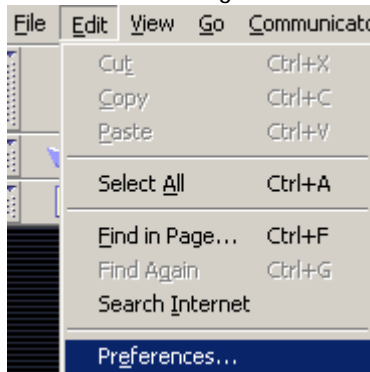

3 Another new screen will appear. Scroll down until you see the area which says Cookies. Make sure you have both sections set to Enable cookies.

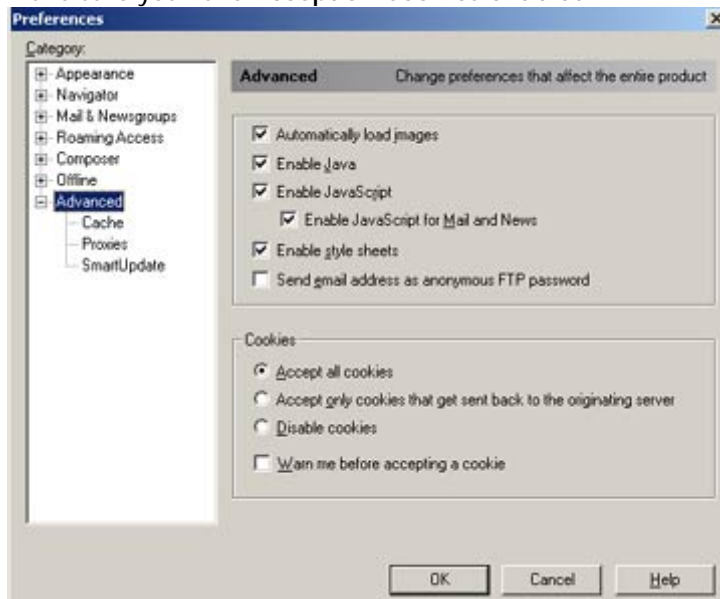

How to activate cookies in Netscape

1 On the toolbar go to Edit then choose Preferences.

2 A new screen will appear. Click on the Advanced tab, then look under the Cookies area to make sure you have Accept all Cookies enabled.

How to activate cookies in Mozilla Firefox

- 1 On the toolbar go to Tools menu then choose Options.
- 2 Select the Privacy icon in the left panel.
- 3 Check the box corresponding to **Allow sites to set cookies**.
- 4 Click OK to save changes.
